Webanwendungen...

WEBANWENDUNGEN

The screenshot displays a web application interface for managing pet owners. At the top, there is a navigation bar with the Spring logo, followed by links for HOME, FIND OWNERS (highlighted in green), VETERINARIANS, and ERROR.

The main content area is titled "Owners" and contains a table with columns: Name, Address, City, Telephone, and Pets. The table lists 15 entries, each with a small thumbnail image of a pet next to its name.

Name	Address	City	Telephone	Pets
Jeff Black	1450 Oak Blvd.	Monona	6085555387	Lucky
Jean Coleman	105 N. Lake St.	Monona	6085552654	Mae Samantha
Betty Davis	638 Cardinal Ave.	Sun Prairie	6085511749	Basil
Harold Davis	563 Friendly St.	Windsor	6085553198	Iggy
Maria Escobito	345 Maple St.	Madison	608557683	Mulligan
Carlos Esteban	2335 Independence La.	Wauakee	6085555487	Lucky Sly
George Franklin	110 W. Liberty St.	Madison	6085511023	Leo
Peter McTavish	2387 S. Fair Way	Madison	6085552765	George
Eduardo Rodriguez	2693 Commerce St.	McFarland	6085558763	Jewel Rosy
David Schroeder	2749 Blackhawk Trail	Madison	6085559435	Freddy

At the bottom of the page, there is a footer with the Spring logo and the word "powered".

WEBANWENDUNGEN

The screenshot shows the ICE Portal website interface. At the top, it displays "Reiseinformationen für den ICE 109". Below this, it says "Nächster Halt in 6 min" and "Gleis 2". The train's current speed is 108 km/h, and the destination is Osnabrück Hbf at 12:35, with a red digital clock showing 12:46. A warning icon is present. On the left, there's a sidebar with "Menü" and a "hw plus" advertisement for Sasha Show tickets. The main content area shows the route from Hamburg-Altona to Basel SBB, listing stops like Hamburg-Altona, ICE 109 nach Basel SBB, and Gl. 10. It includes buttons for "Vergangene Halte zeigen", "Ab", "An", "Suchen", "Erweiterte Suche", and "Aktuelle Meldungen". At the bottom, there are links for "hvv Deutschlandticket", "Mach mit!", "Schüler*innen", and "Schnelles Internet".

The screenshot shows the Spring website with a navigation bar featuring "HOME", "FIND OWNERS" (which is highlighted in green), "VETERINARIANS", and "ERROR". The main content area is titled "Owners" and displays a table of pet owners with their details:

Name	Address	City	Telephone	Pets
Jeff Black	1450 Oak Blvd.	Monona	6085555387	Lucky
Jean Coleman	105 N. Lake St.	Monona	6085552654	Max Samantha
Betty Davis	638 Cardinal Ave.	Sun Prairie	6085511749	Basil
Harold Davis	563 Friendly St.	Windsor	6085553198	Iggy
Maria Escobito	345 Maple St.	Madison	608557683	Mulligan
Carlos Esteban	2335 Independence La.	Wauakee	6085555487	Lucky Sly
George Franklin	110 W. Liberty St.	Madison	6085511023	Leo
Peter McTavish	2387 S. Fair Way	Madison	6085552765	George
Eduardo Rodriguez	2693 Commerce St.	McFarland	6085558763	Jewel Rosy
David Schroeder	2749 Blackhawk Trail	Madison	6085559435	Freddy

At the bottom, there's a logo for "spring" and "powered by JBoss Seam".

WEBANWENDUNGEN

The image displays four distinct web applications arranged horizontally:

- Booking.com**: A travel booking website showing flight information for an ICE 109 train. It includes details like the next stop at Osnabrück Hbf (Gleis 2) in 6 minutes, current speed (108 km/h), and a Genius Prämien offer for Nils.
- ICE Portal**: A real-time train status application for the ICE 109. It shows the train's current position at Hamburg-Altona, its destination (Basel SBB), and the number of stops remaining (14). It also features a speed indicator (108 km/h) and a "Schnelles Internet" button.
- Reiseinformationen für den ICE 109**: A separate view of the ICE 109's route, showing stops from Hamburg-Altona to Basel SBB, including the number of stops (14) and the current time (10:29).
- Spring**: A pet adoption platform. The header includes links for HOME, FIND OWNERS, VETERINARIANS, and ERROR. The main content is a table titled "Owners" listing various individuals with their pets. The table includes columns for Name, Address, City, Telephone, and Pets. Notable entries include Jeff Black with his dog Lucky, Jean Coleman with Max Samantha, and Harold Davis with Iggy.

WEBANWENDUNGEN

The image shows a Mac desktop with five browser tabs open:

- Booking.com**: A flight search results page for the ICE 109 from Osnabrück Hbf to Basel SBB.
- ICE Portal**: A travel information page for the ICE 109, showing the next stop at Gleis 2 in 6 minutes.
- HIBERNATE**: A Jira project management interface for the "Hibernate ORM" project, showing a list of tasks and their status.
- sessionize**: A speaker dashboard for Nils Hartmann, showing session details and a public profile.
- spring**: A GitHub repository for "g-graphql-training" by Nils Hartmann, displaying code, issues, and pull requests.

WEBANWENDUNGEN

The image displays a collage of several web application interfaces:

- Booking.com**: A travel booking website showing flight information for the ICE 109 from Osnabrück Hbf to Basel SBB.
- ICE Portal**: A real-time train status board showing the next stop at Gleis 2 in 6 minutes, speed (108 km/h), and a link to 'Schnelles Internet'.
- Hibernate**: A project management tool showing a list of tasks and projects related to 'Hibernate ORM'.
- Microsoft Teams**: A communication platform showing a chat history with Nils Hartmann and other team members.
- Sessionize**: An event management tool showing a speaker dashboard for Nils Hartmann.
- GitHub**: A code repository for a 'spring-graphql-training' project, listing pull requests and issues.
- Eventbrite**: A screenshot of an event page for a 'Frontend for Backend: HTMX oder Single-Page-Anwendung?' event.

WEBANWENDUNGEN

The image displays a collage of several web application screenshots, illustrating various software interfaces:

- Booking.com**: A travel booking website showing flight information for the ICE 109.
- ICE Portal**: A mobile-style interface showing travel details, including a speed of 108 km/h and a next stop in 6 minutes.
- ChatGPT - DALLE**: A collaboration between AI models. ChatGPT asks for a cooking recipe image, and DALLE generates two images of a beef burger.
- HIBERNATE**: A project management tool showing a list of tasks and projects related to "Hibernate ORM".
- sessionize**: A platform for organizing events, showing a speaker dashboard for Nils Hartmann.
- Microsoft Teams**: A communication and collaboration platform showing a chat history and file attachments.
- Spring Framework**: A Java-based framework, showing a table of owners with columns for Name, Address, City, Telephone, and Pets.

WEBANWENDUNGEN

Die Webanwendung gibt es nicht

The image is a collage of several screenshots from various web applications, demonstrating different types of web-based tools and interfaces:

- Booking.com**: A travel booking website showing flight and hotel search results.
- ICE Portal**: A travel-related portal showing flight status (108 km/h) and a map.
- ChatGPT - DALL-E**: A screenshot of a conversation with AI models, showing two generated images of a "Classic Beef Burger".
- Hibernate ORM**: A screenshot of a project management interface for the Hibernate ORM software.
- Vorgänge**: A screenshot of a task or event management system.
- sessionize**: A screenshot of a speaker dashboard for sessionize.com.
- spring**: A screenshot of a web application for managing pet owners, listing names, addresses, cities, phones, and pets.
- Google Sheets**: A screenshot of a Google Sheets spreadsheet with multiple tabs and data.

WEBANWENDUNGEN

Die Webanwendung gibt es nicht
...aber: (fast) alle brauchen JavaScript

The screenshot shows a Mac OS X desktop environment with a Dock at the bottom. On the Dock, there are icons for 'ICE Portal', 'Booking.com', 'ChatGPT - DALL-E', and 'hvg plus'. Above the Dock, four browser tabs are open:

- ICE Portal**: A dark-themed portal with a speedometer showing 108 km/h and a map icon.
- Booking.com**: The official website for booking travel accommodations.
- ChatGPT - DALL-E**: A tab showing two images of a 'Classic Beef Burger' from a cooking recipe website.
- hvg plus**: A news portal with sections for 'Attendee', 'Front oder', 'Going (8)', and 'See others'.

The screenshot shows a web application interface for a project management tool, likely Spring. The top navigation bar includes links for 'HOME', 'FIND OWNERS', 'VETERINARIANS', and 'ERROR'. The main content area displays a table of 'Owners' with columns for Name, Address, City, Telephone, and Pets. Below the table is a section for 'Date' with several date ranges listed. At the bottom, there is a 'Tag' table and a sidebar with user statistics.

Name	Address	City	Telephone	Pets
Jeff Black	1450 Oak Blvd.	Monona	608555387	Lucky
Jean Coleman	105 N. Lake St.	Monona	6085552654	Max Samantha
Betty Davis	638 Cardinal Ave.	Sun Prairie	6085511749	Basil
Harold Davis	563 Friendly St.	Windsor	6085531794	Iggy
Maria Escobito	345 Maple St.	Madison	608557683	Mulga
Carlos Esteban	2335 Independence La.	Waunakee	608555487	Lucky Sly

Beste UI/UX: oft nur mit JavaScript umsetzbar

- Es gibt Fortschritte in CSS und HTML, die JS an mehr Stellen verzichtbar machen, aber nicht an allen
- JS braucht man vielleicht schneller/früher als man häufig denkt

Architekturen

für

Webanwendungen

Ansatz 1: "Klassisch": Serverseitiges Rendern + JS-Schnipsel

- Server erzeugt fertige HTML-Seite
- Für Interaktionen werden Links und Formulare genommen
- Jede Interaktion erfolgt über Server-Roundtrip
- Für Interaktionen wird JavaScript geschrieben

Ansatz 1: "Klassisch": Serverseitiges Rendern + JS-Schnipsel

- Server erzeugt fertige HTML-Seite
- Für Interaktionen werden Links und Formulare genommen
- Jede Interaktion erfolgt über Server-Roundtrip
- Für Interaktionen wird JavaScript geschrieben
- **Typische Vertreter:** **Spring MVC**, PHP, dotNET, Node.js

Ansatz 2: Single-Page-Anwendung (SPA)

- Darstellung erfolgt komplett über JavaScript im Browser
- HTML spielt untergeordnete Rolle
- Backend liefert **Daten** (z.B. REST/GraphQL), kein HTML

Ansatz 2: Single-Page-Anwendung (SPA)

- Darstellung erfolgt komplett über JavaScript im Browser
- HTML spielt untergeordnete Rolle
- Backend liefert **Daten** (z.B. REST/GraphQL), kein HTML
- **Typische Vertreter:** **React**, Angular, Vue

Ansatz 3: Fullstack-Anwendung (mit JavaScript)

- Anwendung ist vollständig in JavaScript geschrieben
- Server läuft mit JavaScript
- Server liefert HTML-Code aus
- Server liefert für interaktive Teile JavaScript-Code aus
- Zum Beispiel als "Backend for Frontend"

Ansatz 3: Fullstack-Anwendung (mit JavaScript)

- Anwendung ist vollständig in JavaScript geschrieben
- Server läuft mit JavaScript
- Server liefert HTML-Code aus
- Server liefert für interaktive Teile JavaScript-Code aus
- Zum Beispiel als "Backend for Frontend"
- **Typische Vertreter:** **Next.js**, SvelteKit, Nuxt, Astro, Qvik

...und HTMX?

HTMX ist eine JavaScript-Bibliothek

introduction

htmx gives you access to [AJAX](#), [CSS Transitions](#), [WebSockets](#) and [Server Sent Events](#) directly in HTML, using [attributes](#), so you can build [modern user interfaces](#) with the [simplicity](#) and [power](#) of [hypertext](#)

htmx is small (~14k min.gz'd), [dependency-free](#), [extendable](#), IE11 compatible & has [reduced](#) code base sizes by 67% when compared with react

<https://htmx.org/>

Versprechen: Aktualisierung der Darstellung ohne selbst JavaScript **schreiben**
zu müssen
(stattdessen "hypertext" 🤯)

Passt zur Variante 1 (serverseitige Anwendungen)

HTMX - Grundlagen

- HTML-Elemente werden mit HTMX-Attributen ergänzt
- Damit wird beschrieben, welche Server Requests bei einem "Trigger" ausgeführt werden sollen
- HTMX kümmert sich um die Ausführung des Requests und die Verarbeitung der Antwort
- Andere Aktualisierungen der UI gehen mit HTMX nicht

```
<html lang="en">
  <body>
    <div hx-get="/hello-world"
          hx-trigger="click"
          hx-target="#result">
      Get Greeting
    </div>

    <div id="result"></div>

    <script
      type="text/javascript"
      th:src="@{/htmx/htmx-1.9.10.min.js}"
    ></script>
  </body>
</html>
```

HTMX – Der Server

- Der Server nimmt (Ajax-)Requests entgegen
- HTMX-Requests sind per HTTP Header zu identifizieren
- Der Server liefert dann HTML-Schnipsel
- Wie die Schnipsel erzeugt werden, entscheidet der Server frei

```
<html lang="en">
  <body>
    <div hx-get="/hello-world"
          hx-trigger="click"
          hx-target="#result">
      Get Greeting
    </div>

    <div id="result"></div>

    <script
      type="text/javascript"
      th:src="@{/htmx/htmx-1.9.10.min.js}"
    ></script>
  </body>
</html>
```

HTMX – Grundlagen

- HTML-Elemente werden mit HTMX-Attributen

Demo: Hello World

- Das Resultat von localhost:8080/hello

hx-trigger, hx-get und hx-target

- HelloWorldController

("Hypermedia")

```
<html lang="en">
  <body>
    <div hx-get="/hello-world"
          hx-trigger="click"
          hx-target="#result">
      Get Greeting
    </div>

    <div id="result"></div>

    <script
      type="text/javascript"
      th:src="@{/htmx/htmx-1.9.10.min.js}"
    ></script>
  </body>
</html>
```

Code Beispiele

[HTTP://LOCALHOST:8080](http://localhost:8080)

Architektur und Techstack Recipify

Beispiel: Formulare

- Wie werden die Daten gesendet?
- Was kommt als Antwort?
- Wie disablen wir das Formular?
- Wie setzen wir eine (Fehler-)Meldung zurück
- 🧑‍💻 NewsletterRegistration.jte / .tsx

SearchPageContent.jte

The screenshot shows a search interface. At the top right is a small icon of a person wearing a hat and coat. To its right is the text "SearchPageContent.jte". Below this is a search bar with a placeholder text "Type three letters to start search" enclosed in a yellow rectangular border. To the right of the search bar is a "Clear" button.

Fazit

FAZIT: SINGLE-PAGE-ANWENDUNG ODER HTMX?

Single-Page-Anwendung oder HTMX

- It depends (natürlich 😐)

FAZIT: SINGLE-PAGE-ANWENDUNG ODER HTMX?

Single-Page-Anwendung oder HTMX

- It depends (natürlich 😐)
- Will ich eine "Hypertext"-Anwendung bauen
oder
- eine Anwendung, die die Anforderungen meiner Benutzer:innen erfüllt? 😊

FAZIT: SINGLE-PAGE-ANWENDUNG ODER HTMX?

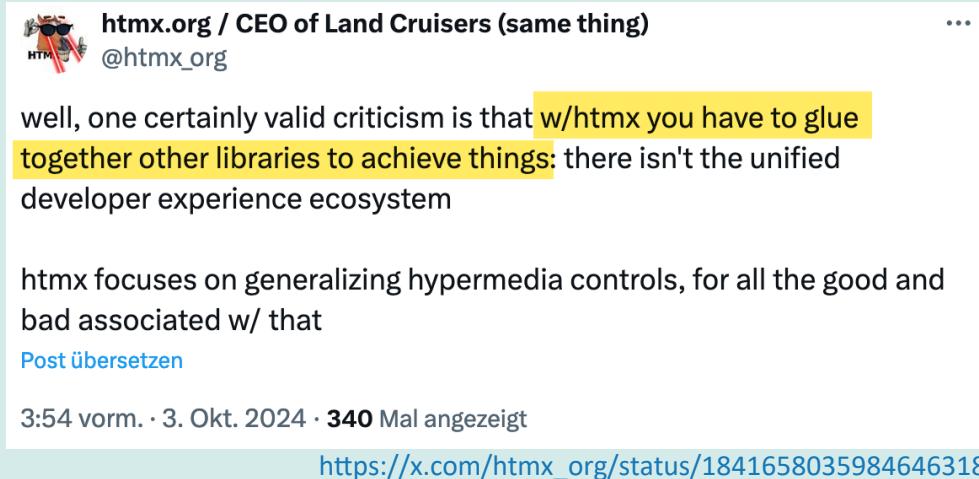

Single-Page-Anwendung oder HTMX

- Für mich ist "wir machen nur HTML plus bisschen JS" zu kurz gesprungen
- Das sieht man auch an der Vielzahl der HTMX-Attribute

FAZIT: SINGLE-PAGE-ANWENDUNG ODER HTMX?

Single-Page-Anwendung oder HTMX

- Für mich ist "wir machen nur HTML plus bisschen JS" zu kurz gesprungen
- Das sieht man auch an der Vielzahl der HTMX-Attribute
- Früher oder später braucht man doch JavaScript

htmx.org / CEO of Land Cruisers (same thing) @htmx_org ...

well, one certainly valid criticism is that w/htmx you have to glue together other libraries to achieve things: there isn't the unified developer experience ecosystem

htmx focuses on generalizing hypermedia controls, for all the good and bad associated w/ that

Executive Summary

- The effort took about 2 months (with a 21K LOC code base, mostly JavaScript)
- No reduction in the application's user experience (UX)
- They reduced the code base size by 67% (21,500 LOC to 7200 LOC)
- They **increased python code by 140%** (500 LOC to 1200 LOC), a good thing if you prefer python to JS
- They reduced their total JS dependencies by 96% (255 to 9)
- They reduced their web build time by 88% (40 seconds to 5)

<https://htmx.org/essays/a-real-world-react-to-htmx-port/>

Executive Summary

These:

Wenn "if you prefer YOUR-BACKEND-LANGUAGE-HERE to JS" zutrifft,

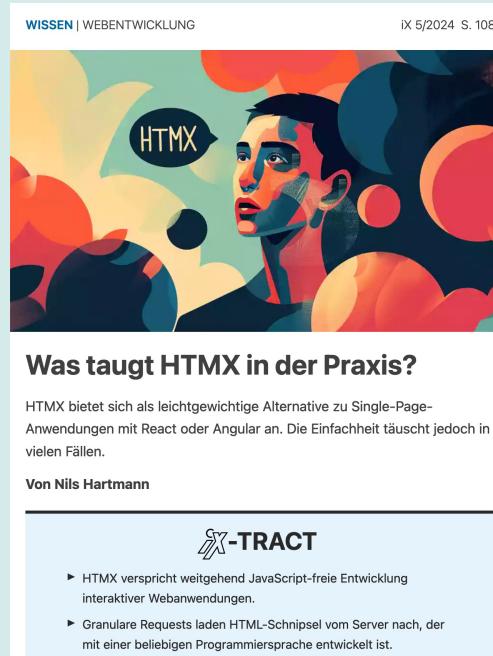

dann ist man vielleicht falsch in der Frontend-Entwicklung

reduced python code by 140% (500 LOC to 1200 LOC), a good thing if
you prefer python to JS

- They reduced their total JS dependencies by 96% (255 to 9)
- They reduced their web build time by 88% (40 seconds to 5)

Mein Artikel (heise / iX) zum Thema: <https://react.schule/heise-htmx>

The screenshot shows a magazine page from 'WISSEN | WEBENTWICKLUNG' issue 'iX 5/2024 S. 108'. The main image is a colorful abstract illustration of a person's face surrounded by large, stylized, overlapping shapes in shades of red, orange, yellow, and blue. A speech bubble above the head contains the text 'HTMX'. Below the image, the title 'Was taugt HTMX in der Praxis?' is displayed in bold black font. A short text summary follows: 'HTMX bietet sich als leichtgewichtige Alternative zu Single-Page-Anwendungen mit React oder Angular an. Die Einfachheit täuscht jedoch in vielen Fällen.' Below this, the author's name 'Von Nils Hartmann' is listed. A horizontal line separates the main text from a sidebar. The sidebar features the 'iX-TRACT' logo with a stylized 'iX' icon. Two bullet points provide additional information: 'HTMX verspricht weitgehend JavaScript-freie Entwicklung interaktiver Webanwendungen.' and 'Granulare Requests laden HTML-Schnipsel vom Server nach, der mit einer beliebigen Programmiersprache entwickelt ist.'
